Other One Q Solutions

- One Q On Premises
- One Q Public Cloud
- One Q Private Cloud
- One Q Hybrid Solution
- One Q JAL solution
- One Q Care MPS solution

Value Proposition

One Q mobile print app is an addition to the One Q Print Management Solution. It works smoothly whether the customer chooses an on-premises solution or a cloud one! The app can be downloaded on iOS or android devices and enables users to manage all prints from one place. It doesn't matter whether printed from the phone, PC, Mac, email2print or web upload, the app will manage prints from all aforementioned options!

- Deploy the One Q Secure Print Management solution and be able to handle all secure print jobs from the palm of your hand!
- The One Q mobile print app enables you to manage prints from any employee device to any MFD/printer of any brand/model
- Comes free with a PULL or RELEASE license and HP JAL One Q Apps

Customer needs

- There is a latent need to be able to print from any device incl. mobiles
- Employees expect to be able to use their mobile devices for any task
- Setting up and managing prints incl. security is often bothersome
- The need to bring your list of job-related tasks with you in an easy way
- Increased security related concern about how employees uses their phones

Customer benefits

- Get it with the One Q on premises or cloud solution
- Simple setup incl. creating QR device stickers & instant login to the app
- Authenticate w/username & password & release jobs w/ QR scanner
- Setup print jobs: numbers of copies, from to page, page size/orientation
- Preview print jobs directly in the app, in the format the mobile supports
- Choose to print in simplex, duplex, black or color & hold print jobs for later
- Track print jobs done via the mobile app on the One Q server
- Print rules e.g. duplex & black/white will also apply, printing from the app
- Easily enable mobile printing on multiple networks on the One Q server
- OS's support most formats for printing e.g. MS Office, iWork, OpenOffice

Services & licenses

- Preconfiguration option per device as part of the partners professional services portfolio: (1) create QR codes on the server (2) print QR labels (3) place QR code labels on the printers and MFDs
- FOC for new PULL & RELEASE solutions, N/A for PUSH solutions
- With existing license & maintenance for L-PULL, L-RELALL, L-RELEASE the app is FOC
- For JAL One Q solutions the app is FOC but N/A for JAL Access Control app

The key differentiators comparing to competitors

Main competitors: MFP manufacturers & Print Management SW vendors

- Very simple UI and workflow
- Easy to understand and use by employees
- Multiple print job possibilities from any device to any device via the app
- Works with the One Q Cloud solution too
