

One Q secure mobile printing with elegance

Changing the way, you print securely from mobile phones and tablets with the One Q mobile print app!

Why choose the One Q mobile print app?

The One Q mobile print app is a cutting-edge solution for your mobile phone or tablet, that enables secure printing with all needed functions and features you get with the standard One Q solution. The app adds extra flexibility to secure printing and not least enhances productivity, allowing you to print from any of your personal mobile devices, all outputs voyaging through the One Q solution. Covering all devices an employee uses for printing, enables the organization to raise overall information security, enhance the corporate print policy, improve the control of printing costs and not least, lowering carbon emissions from printing.

What other solutions do we provide?

Our Secure Print Management solution is highly flexible, scalable and extraordinarily easy to install, and can be deployed on premises, in the cloud (private or public) or as a hybrid solution, according to specific needs. We also provide our unique One Driver, that eliminates the need for multiple print drivers, serving all models of printers from all vendors. Finally, we optimize fleets with our One Q Care managed print service solution!

One Q Mobile Print App Benefits

- The One Q mobile print app works with both our on premises and cloud solutions
- Authenticate with username and password
- Securely release print job(s) at any network device, printer or MFP via the QR code scanner
- Setup print jobs e.g. number of copies, from to pages, paper size, paper orientation
- Preview print jobs in the format that the mobile device supports e.g. pdf or picture
- Choose to print in simplex, duplex, black or color and hold print jobs for later printing
- Release jobs from your queue, printed from the app, PC, Mac, email2print or web upload
- Tracking of prints done via the mobile app on the One Q server
- One Q server print rules applies to prints done from the mobile app
- You can easily enable mobile printing on multiple print networks on the One Q server
- The IOS app supports iWork, MS Office, csv, RTF, PDF, TIFF, JPEG, GIF, PNG, Raw
- The android app supports same as IOS (÷ iWork) plus OpenOffice (odt, ods, odp)

How does it work and how do I get it?

The One Q mobile print app works together with the One Q Secure Print Management solution. Simply contact your MFP and printer supplier, who will be able to demo and help you with the deployment. The One Q mobile print app is available for download via Apple App Store and Google play.

Our key focus is being the best, delivering the best!

One Q technologies strives for excellence! We pay attention to our customers latent needs. We apply Scrum and ITIL to product development and understand that customer feedback enables us to create outstanding solutions. We therefore incrementally enhance our solutions and features and add new functionalities according to global business trends!

In a world where disruption is a must to stay in business, we take pride in helping our customers staying competitive, become more effective and save money. Our whole value creation from software development to service and support is centred around these objectives!

We therefore strive to become your business partner, helping you to take control of print devices, reduce printing cost, capturing print data and not least ensuring a greener approach to printing!
